

SCENIC IMAGE COLLECTION

Contributors: Corinthia Clayborn, Karyn Elliot, Lauren Lundy, Ryan Rush, and Lindsey Villareal

The Scenic Image Collection features a visually stunning variety of images showcasing diverse natural and urban landscapes from popular tourist areas in the United States and Mexico.

Purpose & Scope

The collection encompasses photographs that highlight environmental features, changes, and human interaction with the captured landscapes.

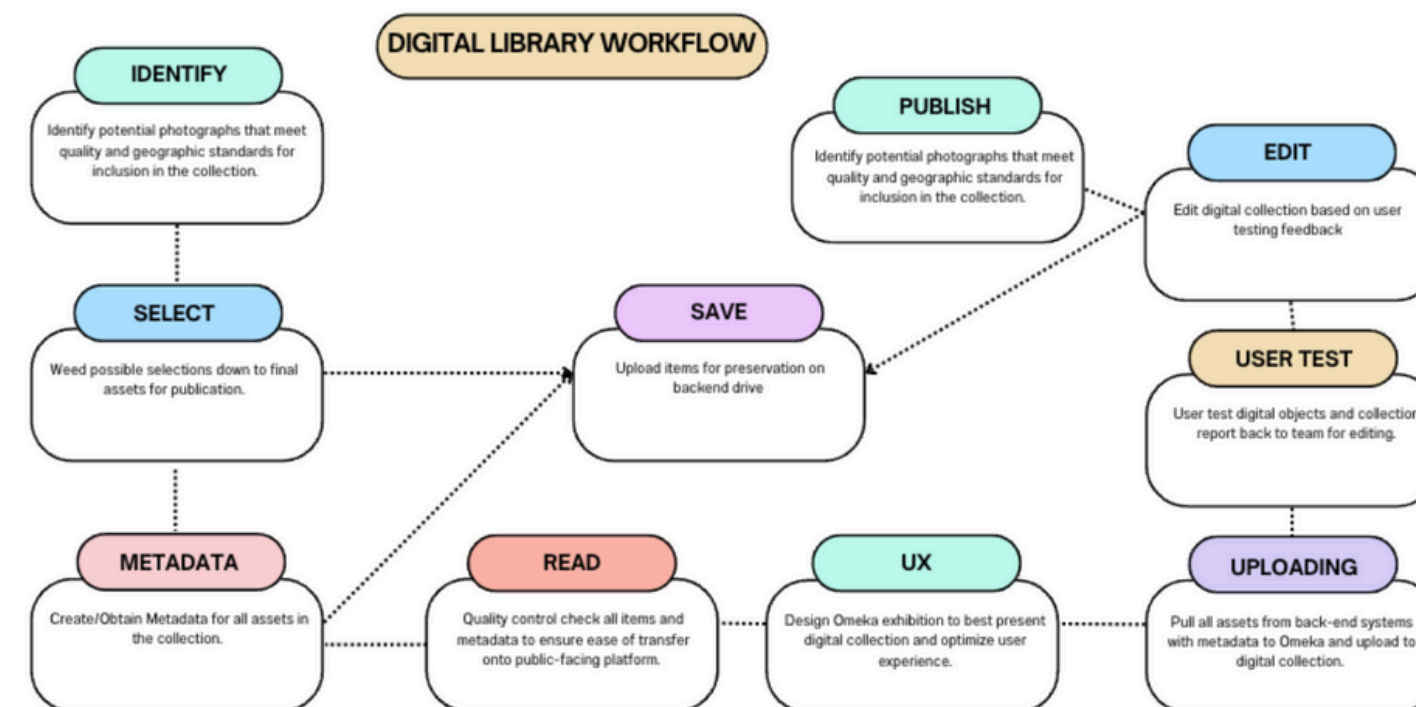

Selection Process

Two members compiled 25 photos of their choice to the collection. Each photo had to fit the criteria of being a landscape image taken in a scenic area.

Workflow

Metadata Creation

Omeka and OneNote were used to manage and generate metadata for this project. Metadata was created according to the Dublin Core standard.

Conclusion and Reflection

- **Successes:** Group members were able to successfully collaborate on all aspects of this project. Group members were able to complete all tasks in a timely manner and maintained communication regarding any possible delays. Group members created or are in contact with the creator of assets, leading to increased transparency on rights statements.
- **Limitations:** A limited number of images makes it challenging to capture other viewpoints of the landscape. The Group Members were limited to the generic class Omeka leading to limited customization opportunities.
